Description

The NANOCHEM[®] H/HP-Series Purifiers provide economical gas purification in multi-tool or single-source applications.

With a welded bypass valve incorporated in the purifier unit, H/HP-Series purifiers are often used in gas enclosures, both source and purge gas, where space is limited. Its low width makes it ideal for installation in restricted space or gas jungle applications where multiple vertical gas lines are being run.

Purification media refills are available through Matheson Tri-Gas, Inc.
